Figure 1 consists of seven sub-graphs, labeled (a) through (g), each representing a different protein. The y-axis for all graphs is 'PERCENTAGE OF TOTAL PROTEIN IN SUPERNATANT FRACTION' ranging from 0 to 100. The x-axis is 'HOURS' ranging from 0 to 6. The data points are connected by lines, showing the percentage of protein in the supernatant fraction over time.

- (a) p115: Shows a rapid increase from 0% at 0 hours to approximately 80% at 1 hour, then remains relatively stable around 80% through 6 hours.
- (b) p116: Shows a rapid increase from 0% at 0 hours to approximately 80% at 1 hour, then remains relatively stable around 80% through 6 hours.
- (c) p117: Shows a rapid increase from 0% at 0 hours to approximately 80% at 1 hour, then remains relatively stable around 80% through 6 hours.
- (d) p118: Shows a rapid increase from 0% at 0 hours to approximately 80% at 1 hour, then remains relatively stable around 80% through 6 hours.
- (e) p119: Shows a rapid increase from 0% at 0 hours to approximately 80% at 1 hour, then remains relatively stable around 80% through 6 hours.
- (f) p120: Shows a rapid increase from 0% at 0 hours to approximately 80% at 1 hour, then remains relatively stable around 80% through 6 hours.
- (g) p121: Shows a rapid increase from 0% at 0 hours to approximately 80% at 1 hour, then remains relatively stable around 80% through 6 hours.
